White Noise Generator Kit (Item: DD1010)

4 X the protection from eavesdropping! The J1000 is an economical handheld, battery operated White Noise Generator. The J1000 (AJ-34) creates an additional barrier of noise interference, making it possible to mask your conversation when confidentiality is necessary. Protects your sensitive room conversations by generating a random masking sound which desensitizes any near-by microphone.

Features:

Protect your conversations 4 x better with the White Noise Generator Kit! Comes with 4 Noise Generator that you can quickly deploy wherever you are. The easy, rugged carry case makes it easy to travel with.

All types of bugging devices transmit or record every sound generated within its detection range. The J1000 (AJ-34) generates a sound that will mask the human voice. As long as the volume of the conversation is lower than the volume of the J1000 no bugging device can separate the conversation from the masking noise.

- Each unit Protects up to 150 ft of space
- Effective against any microphone based eavesdropping device
- Use in conference rooms, hotels, anywhere there is a threat of eavesdropping.

Note: these device emit a white noise.
