Mini Portable MPEG-4 DVR

User Manual

Security   Instruction

Before using this product, please carefully read the instructions it will let you enjoy various features of the product

Keep your battery charged,

If Battery is low recording audio and video or transfer files may cause system errors, resulting in loss of data!

Don't not tamper with unit!

Otherwise there will be an electric shock hazard!

Touch-DC converter components May lead to electric shock

In order to prevent the use of DC converter operation when questions, please read the [Manual]

Note:

Avoid the use of this product contact with water or other liquids, or else there will be an electric shock or fire danger! Your safety, please use the Product to provide power converters (for the use of non-provided converter damage caused by products, manufacturers takes no responsibility for), please note I would like to use with the converter in line with the socket, otherwise there will be an electric shock or fire danger to DC converter plug is firmly inserted into a power outlet.

Security Instruction

Do not use a damaged battery or charger

☐ Do not allow battery charging time exceeds the allotted time

☐ At first the use of batteries or battery unused in a few months after the reuse, please fully charge the battery.

☐ for the battery is fully charged, the use of its fully discharged, then recharge in order to ensure its longer life,

At short-term use after the battery will shorten battery life, in this case, repeatedly for the battery is fully charged and then fully discharged several times, so you can use the battery a longer period of time

☐ Overcharging or excessive discharge will shorten the life of rechargeable batteries

☐ When the rechargeable battery life than the use of a new rechargeable battery short time, replace the new rechargeable batteries.

☐ because of rechargeable batteries are consumables, so battery life will be shortened over time.

☐ Careful not to let any conductor (such as necklaces, bracelets, etc.) to enable access to DC converter or a rechargeable battery side short-circuit, or may cause electric shock or fire

Product features

Multiple record mode: Motion detect record/manual record
Storage full over writes automatically

Fast video recording by one key function

Recording, power ON/OFF via remote control

Real time Display/Recording at 30fps with date and time stamp

960 * 240 high-definition 2.5/2.7-inch LCD screen

Support 32GB TF memory card

Video resolution: 800*600/640 * 480/320 * 240 optional

Video frames 10-30 frames / second optional

High-speed USB2.0 interface.

Audio and video input / output;

Configuration removable high-capacity lithium battery, 5 hours of continuous playback, video recording up to 2 hours standby

Parts Introduction

1. Power Switch	8. Loudspeakers
2. Record button	9. Video / audio input
3. Select Key	10. Charging Indicator
4. Select Key	11. Recording Indicator LED
5. ESC button	12. Video / audio output
6. Enter button	13. USB port
7. TF card slot	14. Mode switching key

Remote controller Introduction

1. Power ON	3. Key ring
2. Power OFF	4．LED Indicator

User Guide

Hold the Power On/Off button ⏻ for 3 Seconds to turn On/Off the Device.
