4.Attention!

- This device is powered by Lithium polymer battery and is expected to be used for 5-8 months when fully charged. The app on your phone will have prompt if the battery is low. Please charge the device promptly after received the prompt.
- Please make sure your device can receive WIFI signal while installing, especially outdoor installation. If WIFI is not available or signal weak, Please use WIFI signal amplifier to increase.
- This device is a low-power smart product which supports remote wake-up by APP, PIR human body detection wake-up, wake up by doorbell.

it will enter hibernation automatically and guides the next wake-up after wake-up and working 30 seconds.

Technical Specification

Resolution	1920*1080P
Field of Angle View	2.6mm @F2.0/155°
IR LED	6*850nm
Wi-Fi	802.11 b/g/n
Audio	Two-way talk with noise cancellation
Recording	TF card (Above C10 high speed brand card is needed)
Storage	Cloud Storage or 8G/16G/32G TF card
Battery	2pcs 18650 batteries are required.
Monitoring	Motion Detection, Remote Live View
Notifications	Push Notifications within 1 second
Device Wakeup	Within 600 ms
Power Consumption	Power Consumption Standby 120 uA, Working 170 mA

Function Introduction

- Two 18650 specification batteries work regularly for 5-8 months
- Million HD Pixels with Ultra-thin 2.6MM Wide-Angle Lenses

- Support waking up device by mobile phone within 1 second.
- 2.4G Wi-Fi connection
- High quality two-way talk with noise cancellation
- Support PIR human body infrared detection. It will push alarm information to your mobile phone APP immediately when someone is at the door
- Day and night mode can be switched automatically. The image is clearly and visible for your safety and family security no matter its day or night.

Q&A

- Q: The device cannot connect to WIFI?
A: 1. Please confirm that the wireless network to be connected is the 2.4G protocol.
2. Make sure the indicator light is in the slow red light state
3. The password is correct, make sure there is no extra spaces.
Q: The device is online and there is a trigger event, but the mobile phone cannot receive the push message
A: The app on the mobile has turned on "self-starting" function and has enabled the notification function on application permission. Turn off "battery optimization" and turn off the function of end app when phones in standby (The mobile phone manufacturer's optimization method is inconsistent. Please take the actual situation as the standard.)
Q: What power supply mode does the device support?
A: 1. The device can work with two 18650 battery alone
2. You can charge the device through TYPE-C

Tip: There will be no further notification of any change of the above functions. Please take the actual object as the standard. Thanks!
